PERSONAL PROFILE

As a Full-stack Developer, I bring over 1 year of hands-on experience in contributing significantly to diverse teams, fostering impactful outcomes across various project scopes. My expertise lies in harnessing the power of JavaScript and its frameworks to craft compelling and user-centric experiences. I excel in thriving within collaborative environments, adeptly contributing ideas, and crafting solutions that drive customer satisfaction.

WORK EXPERIENCE

Solid Solutions
Backend Developer | January, 2023 – Present
- Solid Solutions is small-size company that develops web applications for the management purposes of local businesses
- Projects I worked in: aspirans, timeacademy, diksiya, mountainguide, ingilisdili

My responsibilities:
- Build and maintain Restful API servers
- Worked with other developers to implement frontend side of the applications
- Professionally used Node.js, Express.js, MongoDB (Mongoose, Transactions, Aggregations)
